PARAFFINS  
SILICONES

10 Single-use sachets  
Net weight 30 ml

## AUSILIUM CREMA®

**AUSILIUM CREMA®** Ausilium Crema reduces the micro-lesions resulting from sexual intercourses or alterations such as vaginal dryness, bacteria attack, inflammatory forms (itching, burning), contributing to the natural defense of the mucous membranes and to their trophism. D-mannose intercepts pathogenic bacteria thus limiting the possibility of the appearance of "ascending cystitis" and "honeymoon cystitis".

Lubricating, moisturizing and emollient action. It fights the dryness of the vaginal mucosa and increases its elasticity. It helps to attenuate the micro-lesions of the vaginal mucosa caused by sexual intercourses.

### INGREDIENTS:

**D-mannose:** it inhibits the adhesiveness of bacteria and helps to restore the glucosaminoglycan layer (GAG).

**Morinda citrifolia:** anti-inflammatory, pain-relieving, antibacterial, antifungal, cicatrizing and re-epithelizing properties.

**Boswellia serrata:** anti-inflammatory action.

**Calendula officinalis:** soothing, anti-inflammatory, emollient and moisturizing action. It increases the blood supply by promoting the oxygenation of the tissues and their trophism.

**Lavandula angustifolia:** antibacterial, antifungal and healing action.

**Hyaluronic acid (expressed in sodium hyaluronate - 96:100):** moisturizing and lubricating action, it combats the dryness of the mucosa, increasing its elasticity and helping to accelerate the healing.

It plays a fundamental role in the regeneration of the glucosaminoglycan layer (GAG).

**METHOD OF USE:** To benefit from the lubricating or soothing action gently insert it with your finger or applicator before the sexual intercourse. In case of vaginal dryness, burning, itching or irritation apply once or twice a day.

**WARNINGS:** The contents of the sachet must be completely used for each application.

**DOES NOT CONTAIN:** Parabens, Petrolates, Paraffins, Silicones.

**CONDOMS COMPATIBLE**
